

PRINAM®
INDUSTRIES

PROFILE

Company Overview

Prinam Industries serves its clients as a trusted ally, providing them with the loyalty of a business partner. We make sure that our clients have what they need in order to run their businesses at peak performance levels, with maximum efficiency and reliability. Many of our information applications are mission-critical, so we assure our clients that we'll be there when they need us.

Vision Statement

To be a trusted Service Provider who delivers outstanding customer service and providing significant values.

Mission Statement

Our strategic objective is to deliver projects that fulfil the customer's specifications. These specifications include the project being delivered on time, within budget and complete legitimacy.

Sheq Consulting

We provide a custom made service to companies and individual who require assistance, implementation and maintenance of safety, health and quality systems on-site and in construction firms. Our consultants assess your work place, identify the hazards and associated risks of your business activities. Once identified, control measures are recommended to reduce or eliminate the risk to a level which is reasonably practicable.

- Risk Analysis & Management
- Procurement Controls & Contracts
- Preparation & Agreement
- Budgeting
- Site Inspections
- Monitoring Quality

SERVICES

Designing

We have very creative designers, who focus on covering and meeting the needs and demands to create living spaces, office buildings and structures of all sorts. When designing they take into account that they should carry out an analysis to design and build according to the needs and resources. Also they keep in mind the aesthetics and technical characteristics, as well as the basic rules of construction.

- 👁️ Commercial Designs
- 👁️ Property Remodeling & Renovations
- 👁️ 2D/3D Layouts
- 👁️ Interior Designs
- 👁️ Industrial Designs

SERVICES

Engineering

The focus is to engineer high performance buildings that are sustainable, resilient, economically viable, that ensure the safety, health, comfort and productivity of occupants. It is important for us to look at the systems of building, not just the structure. We look at how to build and include the mechanical components. This also helps our designers relate to the whole design package that is involved.

- Structural Engineering
- Civil Engineering
- Structural Assessment
- Pipes & Pipework
- Mechanical Engineering
- Electrical Engineering
